

hostanalytics

— decide

Jim Eberlin founded Host Analytics in May 2000 and led the company as CEO until June 2008. Under Jim's leadership, Host Analytics put into production the first On Demand Corporate Performance Management application in January, 2001.

Prior to Host Analytics, Jim was CEO of Tapestry Computing FAS, a consulting company specializing in financial analytics and ERP software implementations. Jim grew Tapestry into the 20th largest Oracle reseller world-wide. Jim successfully sold Tapestry to Braun Consulting, a public consulting company with practices in business intelligence, ERP, and CRM, that was later acquired by Fair Isaac. Jim's companies have been published in books such as *Renting Business Applications*, by Mary Lacity and *Getting Partnering Right*, by Neil Racham, author of *Spin Selling*.

Jim has been on the speaking circuit for performance management and global information technology sourcing. Jim has a BA in business at Maryville University. Jim and his family live in St. Louis, MO.
